

People are on the move and the need for connectivity moves with us

AT&T 5G helps customers stay connected to **fast, reliable, and secure mobile experiences** to ensure that you never lose connectivity. Faster speeds, lower latency and massive connectivity open new possibilities for business to revolutionize industries.

Even if 5G is not available, these plans will work over LTE to ensure constant connectivity without fear of losing data and service.

Dynalink's new 5G/LTE pricing makes backing up your primary internet connection that much easier.

Either bring your own router, or choose one of ours, Dynalink makes it easy to connect to wireless service.

Not sure if this is a fit for your organization, try us out as all of our wireless products are **MONTH TO MONTH – NO COMMITMENT.**

You can choose any router from our selection of 5G routers starting at \$350 for an AT&T Gateway or simply bring any device that handles a 5G sim card and GO!

For the first time, there is no cap on Fixed Wireless, enjoy the full power of AT&T's 5G network.
