

Aggressive Rates for Large Inbound Toll Free

Name your SPIFF, Rate, & RespOrg!

No SPIFF is too big, no rate is too low. We can't say no if you don't ask.
Give TouchTone a shot to quote your toll free business.

- ✓ Tier 1 carrier options - provision to the carrier of your choice
- ✓ Maintain RespOrg or offload toll free number management onto TouchTone
- ✓ Voice redundancy and automatic call routing
- ✓ 4 decimal rounding and 6 second billing increments
- ✓ Integration with existing public IP infrastructure, phone systems, and TDM (PRI/analog) handoffs
- ✓ IAD/gateway available for customers still using legacy premises equipment and PBXs
- ✓ 24/7 in-house, U.S.-based support and Network Operations Center
- ✓ STIR/SHAKEN compliant
- ✓ Self-managed web portal - easily and quickly route numbers or change call flows

Take back control. Manage numbers on your terms.

TouchTone offers SIP trunking customers a unique management feature -- a self-managed web portal that allows users to quickly and easily change routing strategies and call flows. Control inbound toll free and DID routing between multiple sites, IP connections/PRI interfaces, or Remote Call Forwarding.

Contact your channel sales manager to discuss your opportunities, or email partners@touchtone.net.
