

# Managed Firewall Savings

No-cost hardware plus service discounts and free ransomware evaluation

A firewall is like a vigilant and highly trained security guard stationed at the entrance of a building. Just as the security guard carefully examines and filters the individuals entering the premises, a firewall diligently inspects and filters the incoming/outgoing network traffic.

A properly managed firewall is the first line of defense in protecting your business from Internet-based threats. Our next-gen firewall (NGFW) service leverages the industry-leading technology present in Fortinet's FortiGate line of firewalls, providing advanced firewall capabilities, intrusion prevention, web filtering, application control, and more. Paired with our expert 24/7 monitoring and support, which is offered at three different service levels, our solution can provide varying degrees of protection from cyber threats based on your particular needs.

## Limited-time offer:

Sign a new 3-year agreement and:

- Pay \$0 for your purchase of a Fortinet FortiGate Firewall (up to 200F device)
- Discounted rates off of Optimum (10% off) and Secure (20% off) service levels
- Free Ransomware Evaluation: high-level review of a customer's ability to recover from a ransomware attack
