

MetroBOND

MetroWireless Q3 spiff:

2x for x2 !

Sell any MetroBOND service below combining 2 wireless circuits and receive a 2X spiff on MRC.

* 3 & 5 year terms only

ALWAYS ON CLOUD PERFORMANCE

OVERVIEW

MetroBOND leverages the power of Speedfusion™ from Peplink. Bonding multiple circuits into one faster pipe delivers UNBREAKABLE performance for businesses with zero tolerance for downtime.

MetroBOND can bond:

- 1) 5G + Starlink,
- 2) Starlink + Starlink,
- 3) 5G + 5G depending on the best carriers available.

200-400Mbps of additional bandwidth and static IP ranges deliver best in class performance.

With 60% of all data now stored in the cloud, it is mission critical to guarantee access to cloud applications regardless of local disruption. Fiber and coax does not deliver route diversity. Only a wireless circuit can guarantee a no cut/flood outcome.

KEY BENEFITS

- 1) Dual Wireless Circuits
- 2) Route AND Carrier Diverse
- 3) Unlimited Data Usage
- 4) Guarantees Cloud Applications

ORDER TODAY, AND DEPLOY WITHIN TWO DAYS!!

Unbreakable Internet Plans	Term				MTM
	60 Month	36 Month	24 Month	12 Month	
5G + 5G (Unlimited Data)
