

Beyond SASE

Aryaka Unified SASE as a Service

Get it all with converged networking and security:
Performance. Agility. Simplicity. Security.

Why are Companies Turning to Unified SASE as a Service?

Current Networking and Security Solutions are Falling Short

Stitched-together

Multiple point solutions not tightly integrated

Bad Enduser Experience

Unacceptable trade-off Security vs. Network

Operational Complexity

Requires specialized skills and costly consulting services

Prolonged Deployments

Slows down provisioning & configuration

A Bold Approach to the SASE Landscape

 Satmetrix[®]

Unified Single-Pass
Architecture

Global Private
Network Backbone

Network, Security,
Observability.

Flexible Delivery

> Aryaka OnePASS™

A unified single-pass architecture that enforces policy consistently and without user performance impact across global scale deployments

> Aryaka Services

A comprehensive and integrated set of Unified Policy, Network Security, SD-WAN, App Acceleration, AI Acceleration, Observability, integration services and 3rd party solutions.

> Aryaka Zero Trust WAN

A global private network backbone that delivers security and performance from the first to the middle to the last mile of the network

> Aryaka Delivery

Flexible delivery options that allow organizations to implement the solution their way, at their pace and to choose from self-managed, co-managed and Aryaka- managed service delivery
