

Sell Broadband. Score big. Repeat.

We're flipping the SPIFF switch to 2X on our broadband lineup—and it's not just a flash deal. It's a full-on payday parade for our partners

Here's the deal:

When you sell any of the following broadband connectivity products, we'll pay you 2X MRC for circuits \geq \$400, 1X for circuits under \$400.

Qualifying products:

- 5G Wireless Broadband
- Cable Internet
- Ethernet
- Ethernet over Copper
- Ethernet over Fiber
- Wireless Broadband

Yes, that means:

A \$350 circuit sale = \$350 SPIFF in your pocket.

A \$2,100 circuit sale = \$4,200 SPIFF — **and possibly a happy dance.**

Sell more. Earn more.

This isn't a one-and-done. You can rack up as many 2x SPIFFs as you've got deals to close. No limits. No kidding.

5G Wireless Broadband, Cable, Ethernet, Ethernet over Copper, Ethernet over Fiber and Wireless Broadband products receive a 1x SPIFF when the circuit value less than \$400; and a 2x SPIFF when the circuit value is equal to or is greater than \$400. For the qualified 2x SPIFF circuits, 1x SPIFF is paid out on the normal schedule and the additional 1x will be paid after 12 months of service. 36-month term.

Ready to double-up?

Get with your Channel Manager, check your pipeline, and let's make this the most profitable broadband blitz of the year.
