

Microsoft 365 Ransomware Protection Bundle

Ransomware is one of the most common cyber-attacks companies face. Most ransomware attacks start with phishing triggered by an email. Securing your company's email is one of the best cybersecurity investments you can make. **For just \$8/month/user***, you get:

Managed Security Awareness Training to educate staff on proper cybersecurity hygiene and how to spot phishing

Managed Cloud Backups to restore customer data in Microsoft 365 in case of ransomware attack

Managed Inbox Detection & Response for staff to easily differentiate and report malicious emails

Network Security Evaluation to get an in-depth view of the current state of your network

Eligibility Details:

- New customers
- Or TPx customers new to the services in the bundle (no renewals) or without bundle services at their site
- *Discount is on monthly cost of services. On boarding charges apply.
- Offer valid to December 31, 2025

A successful ransomware attack can devastate any size organization, so put safeguards in place before they're needed.

Did You Know?

75% of SMBs said they'd be able to survive only three to seven days following a ransomware attack. Research suggests that about 90% of successful breaches are caused by human error.
